Mid-term poll – Canadian Results

Release date: November 3, 2006
www.ekos.com

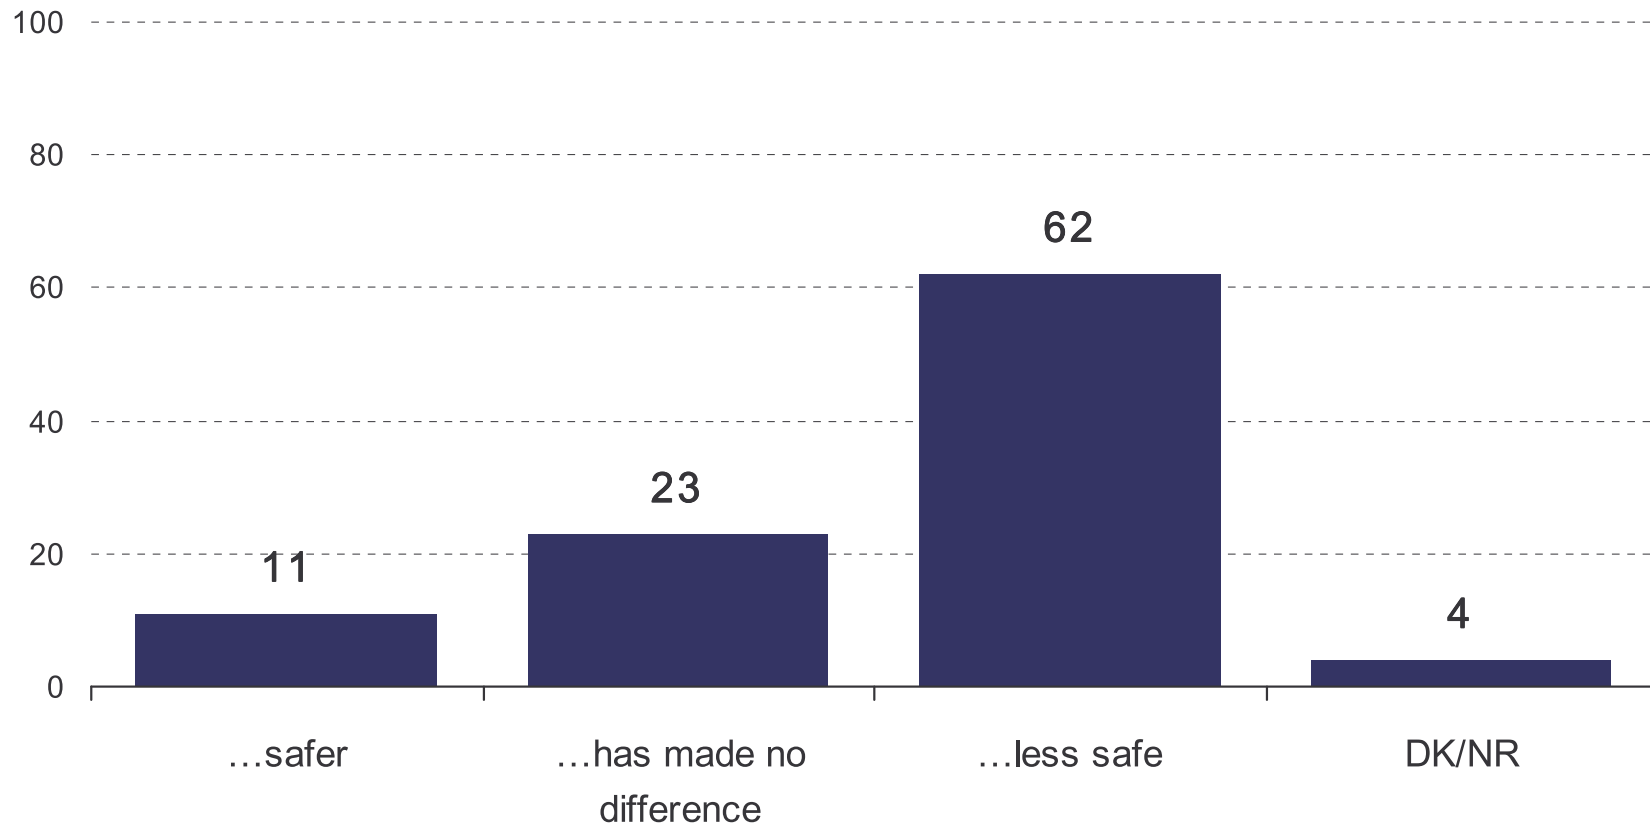

Methodology

- Telephone survey of the general public
 - 1,007 interviews with a national random sample of Canadians 18 years of age and older
 - ✓ Interview period: October 23 to October 26, 2006
 - ✓ National results valid within +/- 3.1 percentage points, 19 times out of 20
 - The margin of error increases when the results are sub-divided
 - It should also be noted that the refusal rate and other measurement errors could also increase the margin of error
- All the data were statistically weighted to ensure the sample's regional, gender and age composition reflects that of the actual population of Canada according to Census data.
