Which of the following issues do think is the biggest problem with democracy in Canada? 39

Which of the following issues do think is the biggest problem with democracy in Canada? 40

Which of the following issues do think is the biggest problem with democracy in Canada? 41

Voter participation rates in Canada have declined dramatically over the past two decades, particularly among young people. Some people argue that by not voting, a citizen gives up his or her right to have a voice in government. Others say that it is important for governments to seek out the opinions of all Canadians, even if they did not vote. Which of these statements comes closest to your own point of view? 42

As you know, the use of social networking websites such as Facebook and Twitter has increased dramatically in recent years. Some people argue that social media is good for democracy since it offers new ways of participating in politics and communicating with the public. Other people argue that social networking is harmful to democracy, since many people will use these websites as a substitute for real world action. Which of these statements comes closest to your own point of view? 45

As you may know, in the May 2nd federal election, The Conservative Party of Canada won a majority of the seats in the House of Commons. Some people say that the Conservatives are holding all the cards and are a safe bet for another majority win in the next election. Others say that the victory was a one time deal and after four years more years, the Conservative Party will return to minority status or even lose power. Which of these statements comes closest to your own point of view? 75

As you may know, in the May 2nd federal election, The Conservative Party of Canada won a majority of the seats in the House of Commons. Others say that the victory was a one time deal and after four years more years, the Conservative Party will return to minority status or even lose power. Which of these statements comes closest to your own point of view? 77

As you may know, in the May 2nd federal election, The New Democratic Party won the largest number of seats in their history, enabling them to form the Official Opposition for the first time. Some people say that NDP support will continue to grow and they will one day form government. Others say that this surge in NDP support is merely a “blip” and it will soon fall back to historical levels. Which of these statements comes closest to your own point of view? 78

As you may know, in the May 2nd federal election, The New Democratic Party won the largest number of seats in their history, enabling them to form the Official Opposition for the first time. Some people say that NDP support will continue to grow and they will one day form government. Others say that this surge in NDP support is merely a “blip” and it will soon fall back to historical levels. Which of these statements comes closest to your own point of view? 79

As you may know, in the May 2nd federal election, The New Democratic Party won the largest number of seats in their history, enabling them to form the Official Opposition for the first time. Some people say that NDP support will continue to grow and they will one day form government. Others say that this surge in NDP support is merely a “blip” and it will soon fall back to historical levels. Which of these statements comes closest to your own point of view? 80

As you may know, in the May 2nd federal election, the Liberal Party of Canada had its worst showing in history, winning just 34 seats. Some people say this is a sign that support for the Liberal party is declining and that the party is ultimately destined for oblivion. Others say that the party has faced major defeats in the past and it will recover and will one day regain power. Which of these statements comes closest to your own point of view? 81

As you may know, in the May 2nd federal election, the Liberal Party of Canada had its worst showing in history, winning just 34 seats. Voter participation rates in Canada have declined dramatically over the past two decades, particularly among young people. Some people argue that by not voting, a citizen gives up his or her right to have a voice in government. Others say that it is important for governments to seek out the opinions of all Canadians, even if they did not vote. Which of these statements comes closest to your own point of view?

As you know, the use of social networking websites such as Facebook and Twitter has increased dramatically in recent years. Some people argue that social media is good for democracy since it offers new ways of participating in politics and communicating with the public. Other people argue that social networking is harmful to democracy, since many people will use these websites as a substitute for real world action. Which of these statements comes closest to your own point of view?

As you may know, in the May 2nd federal election, The Conservative Party of Canada won a majority of the seats in the House of Commons. Some people say that the Conservatives are holding all the cards and are a safe bet for another majority win in the next election. Others say that the victory was a one time deal and after four years more years, the Conservative Party will return to minority status or even lose power. Which of these statements comes closest to your own point of view?

As you may know, in the May 2nd federal election, The New Democratic Party won the largest number of seats in their history, enabling them to form the Official Opposition for the first time. Some people say that NDP support will continue to grow and they will one day form government. Others say that this surge in NDP support is merely a “blip” and it will soon fall back to historical levels. Which of these statements comes closest to your own point of view?

As you may know, in the May 2nd federal election, The New Democratic Party won the largest number of seats in their history, enabling them to form the Official Opposition for the first time. Some people say that NDP support will continue to grow and they will one day form government. Others say that this surge in NDP support is merely a “blip” and it will soon fall back to historical levels. Which of these statements comes closest to your own point of view?

As you may know, in the May 2nd federal election, the Liberal Party of Canada had its worst showing in history, winning just 34 seats. Some people say this is a sign that support for the Liberal party is declining and that the party is ultimately destined for oblivion. Others say that the party has faced major defeats in the past and it will recover and will one day regain power. Which of these statements comes closest to your own point of view?
